2010 Features List

February/March 2010

Volume 32 No 1

Editorial suggestions to
trevor_clarke@idg.com.au

Deadline: Friday Jan 15

Buyers Guide

Desktop virtualisation: The launch of Windows 7 could provide the catalyst for a new wave of virtualisation at the desktop level. But end user experience will make or break the technology. VMware says its PC over IP (PCoIP) technology will dramatically improve user experience, but in the meantime, what can end users do to improve speeds? Are they limited by their carriers and what should IT managers need to know about storage and bandwidth caps and speeds?

Technology feature

Managing the cloud: As IT managers struggle to manage their physical and virtual infrastructure, another complexity is being added to the mix: the cloud. This feature will examine how to manage the cloud as part of the overall IT strategy, looking at both internal and external cloud issues and their interoperability issues.

How do they do IT?

Automobile industry

April/May 2010

Volume 32 No 2

Deadline: Friday Mar 19

Buyers Guide

Smartphones: Beyond the iPhone. A look at the latest smartphone technology and the tools that can help you manage your mobile workforce. In this guide we profile the top smartphones and also look at the leading strategies for managing a mobile workforce.

Technology feature

Endpoint security challenges: Security threats are the hydra of IT management — it seems for every threat neutralised, another two grow in its place. Threats have become ever more sophisticated, targeting endpoints and the data residing on them. This feature will look at endpoint security agents and management tools, as well as how to control access to corporate resources

How do they do IT?

Agriculture and food production

June/July 2010

Volume 32 No 3

Editorial suggestions to
trevor_clarke@idg.com.au

Deadline: Tuesday May 18

Buyers Guide

Storage deduplication: It's tempting to solve storage problems by adding another disk. But organisations, midrange in particular, are increasingly finding they still have concerns with backup performance and restoration profiles. This feature showcases current deduplication products and how they can help IT managers deal with issues such as disk space, tape backup in remote offices, disaster recovery and media management. It will also look at complementary technologies such as information lifecycle management and where it fits into a data management strategy.

Technology feature - June/July

Mobile security: A look at the mobile security landscape, the risks and threats and how IT managers can establish a solid mobile security strategy.

How do they do IT?

Winter Sports / Travel industry

August/September 2010

Volume 32 No 4

Deadline: Friday July 16

Buyers Guide

SMB Servers: In many ways small and medium businesses (SMBs) are no different from their enterprise brethren — they want state of the art equipment, ease of use and high performance out of their servers. And, with the increasing digitisation of workflows, they are becoming more discerning when it comes to vendor choice. This guide will look at the server offerings tailored to the SMB space.

Technology feature

Wireless LAN management: This feature will outline some of the vital signs to look for when buying Wireless LAN management solutions. Effective WLAN management must connect to existing back-end net infrastructure components, such as directories, authentication, security and performance monitoring. The feature will also look at upcoming IEEE wireless standards and what they will mean for WLAN clients, such as 802.11k and v.

How do they do IT?

E-activism. Web 2.0, databases, CRM and ERP for politics and lobbying.

October/November 2010

Volume 32 No 5

Editorial suggestions to
trevor_clarke@idg.com.au

Deadline: Friday Sep 17

Buyers Guide

Printers: Managed print services is about more than having a service provider deliver consumables on time or undertake maintenance tasks quickly. This guide will define managed services and delve into the best strategies an enterprise can take when negotiating a deal with a managed print services provider. We also list some of the best multifunction printers to hit the market.

Technology feature

The future of the desktop: The desktop is dead. Long live the desktop. In this feature we take a look at the future of the desktop and highlight some of the more innovative designs to hit the market this year.
