Work is not where you go, it's what you do.

The modern workforce won't be tethered to a desk.

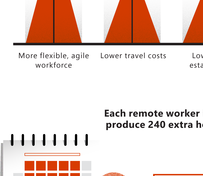
What blocks you (or your workforce) from working anywhere?

It's a mobile world, after all.

Mobility's dramatic impact on our personal lives is changing the expectations around how we operate in our work lives.

of CIOs and IT professionals believe mobility will impact business as much as—or more than—the Internet did in the 1990s.

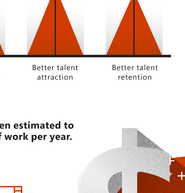
Mobile is quickly becoming the new normal.



of the U.S. workforce will be mobile by 2020.

of workers will only use mobile devices to do their jobs by 2019.

Our devices already outnumber us.



Mobility promotes productivity.

I'm more productive working offsite. **77%**

I accomplish more in less time. **30%**

I accomplish more in the same amount of time. **24%**

I'm willing to work longer hours offsite than onsite. **23%**

The workplace is changing.

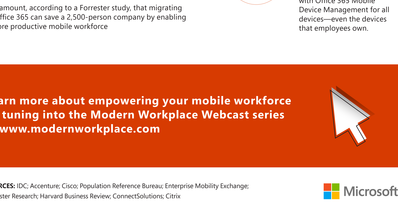
58%

of office space is vacant on any given day.

Mobile work works: The ROI of mobility

It's no accident that organizations are increasingly enabling their people to connect from outside the office. Employers derive at least as much value from remote work as employees do.

Organizations adopting mobile workstyles cite happier, more productive employees and lower costs.



Each remote worker has been estimated to produce 240 extra hours of work per year.

The gains of a mobile workforce are real, according to global organizations that support remote workforces.

Microsoft Office 365 is the anywhere, always-on mobile productivity platform.

Empower your mobile workforce by removing productivity blockers. Familiar tools like Outlook, Word, Excel, Skype for Business, and Yammer stay with employees throughout the day. In today's mobile working landscape, everyone must be able to collaborate and get work done from virtually anywhere—and from their favorite devices.

$2.81M

The amount, according to a Forrester study, that migrating to Office 365 can save a 2,500-person company by enabling a more productive mobile workforce

Office for all your devices

Review, edit, analyze, and present Office documents through a consistent, familiar user experience optimized for Windows, Android, and Apple devices.

Roaming documents

With OneDrive integration, you can use Office apps to access documents from virtually anywhere, pick up where you stopped on the device you were using, and even co-author with others when you are on the go.

Security that follows you

Data protection is built in with Office 365 Mobile Device Management for all devices—even the devices that employees own.
