

ENJOY SAFER TECHNOLOGY™

# **In 1987, we discovered the world's first computer virus.**

In 1987, a high school student in Vienna wrote a virus (not surprisingly called "Vienna") that became a real nuisance and had in many ways sparked the creation of the antivirus industry. Letters were dropping from displays and computers started playing a hymn called "Yankee Doodle". As funny as this sounds, soon it became very clear that this problem was not with the hardware, it was a virus. So the battle began.

That's when Peter and Miro, the original ESET founders, cut their teeth discovering and fighting this world's first virus, leading us to where we are now.

## HISTORY

- Discovered the first computer virus in the world in 1987
- Pioneers of antivirus protection
- Remains the largest privately owned IT security company
- The current CEO is the original ESET engine architect and founder

## WHERE WE ARE NOW

- The fastest-growing security software vendor in the global top-5 according to Gartner
- The only solution in the world that has never missed an in-the-wild virus
- The first and only IT security company to earn over 100 Virus Bulletin awards (Oscars of the industry)

## MAKING THE WORLD A SAFER PLACE

- Protecting over 110,000,000 direct users
- Protecting over 500,000,000 Google Chrome users (Google Chrome security is powered by ESET)
- Protecting over 2,000,000,000 Android users (ESET is the founding member of the Google App Defense Alliance)
- Protecting users in over 200 countries

## USER BENEFITS

- Minimal device footprint
- Fast accurate detection
- Security system automation
- Minimal intrusion
- Ease of use
- Prompt local support
- Rip & Replace
- Competitive pricing
- Existing license buyout
- Verified ROI
- Unilicense

## PRODUCTS

- Endpoint Security
- MSSP
- Data Encryption
- Two-Factor Authentication
- Data Loss Prevention
- Backup & Recovery
- Threat Intelligence
- Dynamic Threat Defense
- Sharepoint Security
- File Security
- Virtualization Security

## CLIENTS

- World's leading provider of internet search engine services\*
- World's leading online social media and networking platform\*
- Tesla
- Spotify
- Harvard University
- Unesco
- Greenpeace
- Deloitte
- KLM
- T-Mobile
- Canon
- Motorola
- Panasonic
- JVC
- Mitsubishi
- Honda
- Renault
- Subway
- University of Canberra
- University of Auckland
- Australian Electoral Commission
- Booking.com
